G3 series Lithium Battery Powered Counterbalanced Forklift Truck

Perfect Combination of Aesthetics and Functional Design.
New generation with characteristics of smart, safe, high efficiency, energy saving and environment friendly.

Maintenance Free

- Unnecessary of fluid adding and dust proofing.
- Daily maintenance free.
- Manual maintenance free.

High Reliability

- High IP Protection Level of Vehicle.
- Maintenance-free integrated axle which is mature and has been tested by market is used on the truck.
- Oil-cooled wet disc type brake is free from maintenance.
- Maintenance-free AC motors are used for driving and pump motors.
- World famous controller is used.
- Large smart instrument can monitor the truck state overall and it is safe and reliable.

Long Service Life

- Longer service life than lead-acid battery in equal working condition.
- 5 years or ten thousand hours quality guarantee for high performance lithium battery assembly, over 75% capacity reserved.

High Safety

- Tail-free structure reduces the center of gravity and improves lateral stability.
- High strength and integrated type welded overhead guard improves safety.
- Side-pulling battery changing way is standard configuration and improves battery changing efficiency.
- Middle-positioned battery reduces the center of gravity and improves stability.
- High positioned rotation point of rear axle improves lateral stability of the truck.
- Automatic deceleration when steering improves working safety.
- Mast lifting buffering improves operation safety.

Suitable for working in both high and low environment

- Lithium battery is better than lead-acid battery when working between -25°C and 55°C.
- ENEROC lithium battery PACK with low temperature pre-heating system.

High Efficiency and Energy Saving

- 2-3 hours charging meet 6-8 hours working demand.
- High-energy density, self discharging rate lower than 1% per month.
- 95% energy conversion rate, superior charging and discharging performance.
- Flexible to charge, easy to operate, no impact on battery life.
- Unnecessary to change battery, cost saving.

Improved man-machine comfort

- Mast lifting and falling buffering makes operation safe and comfortable.
- The truck has lower pedal height and larger egress and ingress space.
- Suspension seat and wide view mast improve driving experience.
- Optimal battery layout and design of counterbalance improve the rear view.
- Lower layout of tilting cylinder improves the space for legs.

The convenience of maintenance is improved

- Electric control is arranged inside the balance weight for easy maintenance;
- Removable oil tank and bottom plate, improve maintenance convenience.

Note: The vertical axis stands for load capacity and the horizontal axis stands for load center which is calculated from the front surface of the forks to the gravity of the standard load. The standard load means a cubic with 1000mm edge length. When mast is tilted forward, using non-standard forks or loading large goods, the load capacity will be reduced. The load capacity of standard mast at different load center can be known from this load chart.

HELI smart fleet management system

Vehicle positioning	Statistical form
Remote diagnosis	Vehicle management
Remote monitoring	Identification recognition (optional)
Maintenance reminder	Weight management (optional)
Battery management	Collision management (optional)

Reliable special designed instrument

- Reliable special meter display the whole truck's working condition, fault detect and other important information completely which make the operator master the whole truck condition directly and conveniently.

Standard configuration	Optional device	
Standard mast	Mast with other lifting height	Pneumatic tyre
Standard fork	Full free lift mast	
Class III standard carrier	Side shifter(hook-on)	
Two-spools valve	Other attachments	
Lithium battery	Fork with other length	
Full suspension seat	No marking tyre	
Overhead guard	Cab	
Solid tyres	Left and right rearview mirror	
Traction pin	Rear work light	
LED signal light, LED warning light(flashing)	Fire extinguisher	
USB interface	Rotating warning light, voice buzzer	
Automatic steering slow down device	Blue warning light	
Colour screen instrument (INMOTION)	80V/810Ah, 80V/900Ah lithium battery
